

MUKARRAM MALIK

Sr. Frontend Developer | React.js | Next.js | JavaScript | TypeScript | UI/UX
Delhi NCR, India | +91 9756235902 | mukarram.malik0909@gmail.com | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Frontend Developer and UI/UX professional with **9+ years of experience** specializing in **React.js, Next.js, JavaScript, and TypeScript**, with strong expertise in building responsive, scalable, and high-performance web applications. Experienced in **UI/UX design, user-centered interfaces, wireframing, prototyping, responsive design, and translating design concepts into functional web experiences**. Skilled in reusable component development, REST API integration, state management, performance optimization, and modern UI development. Hands-on experience with **React Native for iOS and Android**, along with Ruby on Rails API integration. Experienced team leader with a proven track record of mentoring developers, collaborating with cross-functional teams, and delivering end-to-end digital products from **design and development to deployment**.

TECHNICAL SKILLS

- **Programming Languages:** Ruby, JavaScript (ES6+), HTML/HAML, CSS.
- **Frameworks & Libraries:** Ruby on Rails, Next.js, React.js, TypeScript, jQuery, Node.js, React Native, Hooks.
- **Design Tools & Libraries:** Bootstrap, Tailwind, Framer Motion, Figma & Prototyping, Sketch, Miro, PSD & Prototyping, RTL (Arabic UI/UX), Shopify Design, Sharetribe Design, Marketplaces Design, Admin Panel Design, SASS Design, Chat Window, iOS & Android development, performance optimization and mobile app deployment.
- **APIs & Integrations:** REST APIs, Redux, Hooks, Stripe, Razorpay, Meta (WhatsApp / Instagram), Google OAuth, Twilio, Google Maps.
- **Databases:** PostgreSQL, MySQL, Supabase.
- **Authentication & Security:** JWT Authentication, Role-Based Access Control (RBAC), Secure API Design, OAuth (Google, Apple, Facebook).
- **Tools & Platform:** Git, GitHub, Postman, Google Tag Manager, Trello, Jira.
- **Testing & CI/CD:** Jest, Continuous Integration (CI)/Continuous Deployment (CD).
- **Operating Systems:** macOS, Ubuntu.

PROFESSIONAL EXPERIENCE

Senior Frontend Developer (React.js, Next.js & UI/UX)

Adware Technologies Pvt. Ltd | Feb 2017 – Present | Delhi NCR

- 9 years of experience in frontend development and UI/UX design for web-based products.
- Specialized in building responsive, high-performance interfaces using React.js, Next.js and TypeScript.
- Hands-on experience collaborating with Ruby on Rails backends and REST API integrations.
- Strong expertise in marketplace platforms including Shopify and Sharetribe customizations.
- Experienced in RTL (Arabic) layouts, Gulf-region localization, and responsive UI systems.
- Implemented light/dark themes, chat interfaces, and smooth transitions using Framer Motion.
- Experienced in converting Figma, Sketch and PSD designs into pixel-perfect, responsive user interfaces.
- Create Figma designs and interactive prototypes aligned with product requirements.
- Designed and developed responsive chat window interfaces for Desktop, Mobile, iPad, and iPad Pro.
- Comfortable with Git workflows, code reviews, and structured development processes.
- Experience deploying frontend and full-stack applications on Vercel, Railway, AWS, Netlify, and DigitalOcean.

KEY PROJECTS

Carbidmaroc.com — Online Car Bidding & Marketplace Platform

Platform for purchasing new and used cars through a competitive bidding system

- Developed a responsive React.js frontend using SASS and reusable components, focusing on scalable UI architecture and consistent user experience.
- Implemented UI/UX for car discovery, vehicle details, bidding, and checkout workflows.
- Integrated Ruby on Rails REST APIs to dynamically display featured cars, vehicle listings, details, and marketplace data.
- Built the landing page and featured-car sections with dynamic API-driven content.
- Improved checkout UX and frontend performance through usability enhancements, profiling, and iterative optimization.

Microbids.io — Real-Time Auction & Digital Marketplace Platform

Real-time bidding and digital marketplace platform

- Architected and developed a full-stack real-time bidding and marketplace platform using a service-oriented architecture.
- Built secure JWT-based authentication with Google, Facebook, and Apple OAuth, supporting seamless social login and user onboarding.
- Integrated Stripe Payment Gateway for secure wallet funding, transaction processing, and multi-currency support.
- Designed the iOS and Android mobile application UI/UX, creating responsive and intuitive user experiences for auction and marketplace workflows.
- Developed mobile application interfaces and integrated REST APIs to connect frontend screens with real-time bidding, user, wallet, and marketplace functionality.
- Implemented reusable UI components and interactive workflows to provide a consistent experience across web and mobile platforms.
- Developed reusable and maintainable components with a focus on TypeScript best practices, responsive UI, performance, and scalability.

Factormena.com — B2B Marketplace & Supplier Platform

B2B SaaS platform for building and monetizing AI-powered chatbot solutions

- Designed and developed the complete web application UI/UX from scratch using Next.js, React.js, TypeScript, Hooks, CSS, and SCSS, creating a modern, responsive, and scalable marketplace experience.
- Developed core B2B marketplace functionality for managing products, suppliers, customers, and marketplace workflows.
- Built a comprehensive admin panel to manage products, users, suppliers, content, and other platform operations.
- Integrated REST APIs to connect the Next.js frontend with the backend and enable dynamic data management across the application.
- Developed reusable and scalable UI components with a structured SCSS architecture to maintain consistency and simplify future development.
- Implemented responsive interfaces and optimized frontend interactions for a seamless experience across desktop, tablet, and mobile devices.
- Collaborated across frontend and backend functionality to deliver an end-to-end B2B marketplace platform.

Monetizeai.io — B2B SaaS AI Chatbot Platform

B2B SaaS platform for building and monetizing AI-powered chatbot solutions

- Migrated and customized the Sharetribe marketplace frontend from Rails to Next.js, modernizing the user interface while maintaining integration with the existing Rails backend.
- Developed a responsive and scalable frontend using Next.js, React.js, TypeScript and reusable UI components across the product's core workflows.
- Designed and implemented UI/UX for key product flows, focusing on usability, consistency, and responsive experiences across devices.
- Integrated frontend functionality with Rails APIs to support dynamic marketplace and AI chatbot-related data and workflows.
- Built and maintained reusable component patterns to improve development efficiency, consistency, and maintainability across the platform.

Allotme.co.uk — Property Rental & Booking Marketplace

Property rental platform with allotment and booking management features

- Customized and enhanced the Sharetribe marketplace UI integrated with its Ruby on Rails backend, delivering responsive and user-friendly web experiences.
- Developed and integrated a React.js-based top navigation bar within the existing Rails application.
- Designed and developed parking area allocation and booking functionality using JavaScript, enabling users to view available spaces and manage bookings.
- Implemented responsive UI components and interactive user flows with a focus on usability, accessibility, and consistent user experience.
- Worked closely with Rails-based backend functionality to integrate frontend features and ensure smooth data flow across the marketplace.

PulseAlign.com — Health & Wellness Platform for Therapists and Patients

Digital health and physiotherapy platform connecting therapists and patients

- Designed the complete UI/UX from scratch for the PulseAlign platform, creating responsive, user-friendly interfaces for therapists and patients.
- Developed the frontend UI within a Ruby on Rails application using SCSS, establishing a structured and reusable styling pattern across the platform.
- Created responsive layouts, interactive components, and animations to deliver engaging and intuitive user experiences.
- Developed an interactive body-part selection system for physiotherapy workflows, enabling patients to identify and select specific areas of concern.
- Built a patient–therapist chat interface to support communication and interaction within the platform.
- Translated UI/UX concepts into functional frontend experiences while maintaining design consistency, usability, and responsive behavior throughout the application.

Farmiezmarketplace.com — Local Farming Marketplace

Marketplace connecting backyard farmers with local buyers

- Designed and developed a fully responsive and animated marketplace UI using Sharetribe Flex and React.js, with a strong focus on usability and modern UI/UX.
- Translated Figma designs into production-ready React.js interfaces, customizing Sharetribe Flex components to match the product's branding and user experience.
- Customized and extended Sharetribe Flex components to support marketplace-specific requirements and user workflows.
- Implemented responsive layouts, interactive elements, and animations to create an engaging experience.
- Developed a branded audio experience/theme, integrating custom audio interactions into the marketplace interface.

Sharehub.co.nz — Local Community Sharing Marketplace

Hire local, support your community

- Designed and delivered the complete UI/UX for a Sharetribe Go marketplace, creating a modern, responsive, and user-friendly experience.
- Customized the Sharetribe Go interface and components to align with the product's branding and business requirements.
- Translated Figma designs into responsive, production-ready marketplace interfaces with consistent layouts.
- Implemented smooth animations and interactive UI elements to improve engagement and overall user experience.
- Developed multi-layout Swiper card sliders for displaying marketplace content in flexible and responsive formats.
- Focused on usability, visual consistency, responsive behavior, and interaction design throughout the platform.

EDUCATION

- Master of Computer Application — IGNOU University, Delhi, India — 2025
- Bachelor of Arts — CCS University, Meerut, India — 2015
- Intermediate — U.P. Board, India — 2012
- High School — U.P. Board, India — 2010
